PROTECTING CHILDREN ON THE ROAD SINCE 1966

britax
römer

At Britax Römer we ensure that parents and their children are safe on the road. The company has been **fully committed** to this goal since it first manufactured safety equipment and accessories for cars in the early 1930s. Since the development of Britax Römer's **first child car seat in 1966**, child safety has been our number one priority. For more than 50 years no costs and efforts have been spared to provide even more security for little ones. Today, Britax Römer develops and manufactures child car seats, pushchairs and bike seats with 90% of our child car seats and bike seats being "Made in Germany" or "Made in Britain".

MADE IN EUROPE

With our strong German and British heritage, Britax Römer is committed to **manufacturing in Europe**. In 2016 we moved to our new custom built headquarters in Leipheim, Germany. Being deeply committed to our European roots, we currently produce **90% of our car seats** and **all our bike seats** in Germany or Great Britain.

DESIGNED
ENGINEERED
TESTED
PRODUCED

MADE WITH CARE

Our philosophy is to provide the **highest quality of products** to our customers, going far beyond the legal standards for purity and cleanliness. From rigorous independent testing at multiple stages during manufacture, to minimum requirements that go **far beyond the legislative guidelines**, to the strict quality control standards we set for every partner we work with. The efforts we have made in this area over the past few years have been recognised by consumer tests such as Stiftung Warentest in Germany, where we continually receive the highest ratings in the chemicals category. Being deeply committed to our European roots, we currently produce 90% of our car seats and all our bike seats in Germany or Great Britain.

MADE WITH CARE

TESTED TO THE HIGHEST STANDARDS

At Britax Römer, maintaining the highest safety standard possible is of the utmost importance to us. That's why we've pioneered **in-house dynamic testing** and operate two world class facilities for car seats in Europe, and in 2017 launched **one of the most modern** and technically advanced crash test centres for child car seats worldwide.

FLEXIBLE OPTIONS FOR COMPLETE FREEDOM

with Prambody

with Soft Carrycot

with infant carrier

with seat unit

As a parent you have to be prepared for everything, especially when travelling with your child. Most of our pushchairs and buggies are **travel system compatible** giving you the **flexibility** to use them the way you want. Depending on the pushchair model, CLICK & GO® receivers are integrated, included, or available separately allowing you to **easily attach** any Britax Römer **infant carrier** or matching **carrycot** onto your pushchair. Plus, if the seat unit can be adjusted to a lie-flat position, you can also attach a **soft carrycot** for full flexibility. So wherever you go, whether you are travelling by car or going for a walk, you can choose whichever travel system option suits your needs best.
